

# M milesman

## compact blend

The only laser offering the blending of  
**FOUR-WAVELENGTH**  
(755nm, 810nm, 940nm and 1064nm)  
to optimize hair removal results.

Milesman Compact Blend 2000W system. The first truly portable diode laser that combines high power, a light-weight handpiece, a super cold treatment tip cooling down to  $-9^{\circ}\text{C}$  and a repetition rate of up to 5 shots per second in “single shot” mode and 10 shots per second in the “sweep” mode. Couple those features with Milesman’s ability to blend wavelengths with the compact represents true game changing technology.

Technology from **Spain and Germany**

### Technological advances

**Milesman Compact is the only laser that emits light vertically** toward the skin. This development increases efficiency by maintaining the density of the laser light in the selected area resulting in a more homogeneous and effective result.

# Milesman COMPACT BLEND

is the only laser offering a single output which is a combination of four wavelengths (755nm, 810nm, 940nm and 1,064nm).

# 9kg

**Every person** has a unique hair structure. Hair color, thickness and root depth can vary within the same body area.

**Every laser wavelength** has a unique absorption rate and depth of skin penetration which makes that laser suitable for a specific type of hair. No single wavelength presents the perfect solution for all treatments.

755 nm  
810 nm  
940 nm  
1064 nm

■ Eyebrows, upper lip.

■ Legs, cheeks, arms, shoulders.

■ Scalp, armpits, pubic area, back, breast.

The Milesman Compact Blend offers the ability to utilize the best of four wavelengths simultaneously. This powerful combination achieves outstanding hair removal results.

- **755nm:** Maximum melanin absorption and shallow skin penetration. Perfect for thin and/or light hair and for hair whose root structure is not deep.
- **810nm:** The “classic” wavelength for hair removal. Medium melanin absorption and deeper skin penetration than 755nm. Perfect for most regular thickness hair possessing average root depth and color.
- **940nm:** Moderate melanin absorption and increased penetration. Perfect for dark hair whose roots are somewhat shallow.
- **1064nm:** Lower melanin absorption combines with the deepest penetration. Ideal for all types of dark hair which is deeply rooted in areas such as the back, scalp, armpits and pubic area.

**Mileman COMPACT BLEND**, – the only laser that completely and effectively covers all possible hair color, thickness and root depth combinations.

## SPECIFICATIONS **M** milesman compact blend

- > **Wavelength:** 755 nm, 810 nm, 940 nm and 1064 nm.
- > **Repetition Rate in “single shot” mode:** 1-2-3-4-5
- > **Repetition Rate in “sweep” mode:** 10 Hz.
- > **Spot size:** 10 x 10 mm.
- > **Peak Power:** 2000W.
- > **Laser dimension:** 420mm x 350mm x 230 mm. (L16.5 x W13.8 x H9.1 in).
- > **Weight:** 9 kg. (19.9 lbs).
